## SMILES OF CHEVY CHASE

Dr. Markogiannakis and her practice, Smiles of Chevy Chase, is known to be the most innovative practice in the area, providing Advanced General and Implant Dentistry to the world through technology, experience, and artistic skill.

Our patients admire our comprehensive approach and clear communication. Being at the leading edge of digital dentistry allows us to complete smile makeovers and full mouth reconstructions seamlessly while guiding our patients through the process towards an optimal result.

We use the PrimeScan digital scanner which is not only more comfortable for our patients by forgoing conventional putty material for impressions but also allows us to show our patients three-dimensional renderings of what their teeth look like and the area being treated. We have an in-office CBCT which allows for better comprehensive treatment, easier x-rays for our patients and assessing all pathology. Clear aligners such as Invisalign and SureSmile are used for the optimal functional and periodontal health of our patients, assuring them less long-term bone loss, better dispersion of forces and the aesthetic effect of straighter teeth.

Follow @smilesofchevychase on Instagram to see how Dr. Markogiannakis is inspiring patients to change the world with their smile, every single day.
